Model-coordinate derivatives | full native node vectors, no normalization
Unprocessed derivative with respect to c²
l2
processed
Independent tangent columns, processed
Objective / (simulation L/T)²
Position x (simulation L)
Unprocessed derivative with respect to v
l2
processed
Objective / (simulation L/T)
Position x (simulation L)
Unprocessed derivative with respect to log(v / 1 simulation L/T)
l2
processed
Objective (dimensionless coordinate)
Position x (simulation L)
Raw processed c² gradient difference, own scale
1e−14
Derivative difference (objective / (L/T)²)
Position x (simulation L)
